# **Framework for Learning Resource Management and Development System for Regions 6, 7, 8**

## **1 Introduction**

This Framework for Learning Resource Management and Development System (LRMDS) describes the standards, processes and guidelines of the systems developed to support implementation by DepED Central Office, Regions, Divisions and Schools initially within the Visayas regions VI, VII and VIII.

A major objective of the system is to provide a technical basis for assessing, acquiring, adapting, developing, producing and distributing quality learning and teaching resource materials for students and instructional support materials for teachers.

The Framework development is a continuing process informed by the collaborative work among the central and regional/division and school personnel on ways of improving access to quality instructional and learning materials. The evolving design, development and implementation of the LRMDS is a critical contributor to the successful implementation of the Basic Education Sector Reform Agenda (BESRA).

This Framework for Learning Resource Management and Development Systems describes the mechanisms to support coordinated and integrated access to quality resources by the DepED Regions, Divisions and Districts and Cluster/School levels. The need for such systems was identified through the research conducted during STRIVE Phase I during 2007 in Divisions 7 and 8 to identify the levels of access to quality learning teaching resources by Divisions and schools.

Research findings showed that the desired 1:1 textbook: student ratio did not exist in most schools surveyed, most teachers had no teacher manuals, teachers were having to use their own money to augment the instructional resources in the schools, schools which lose their textbook collection because of calamities do not get replacements and that few supplementary materials are available at the schools

Baseline studies for Stage II of STRIVE also identified highly variable distribution of resources across all levels and in most subject areas, (English, Mathematics, Science, ALS and TLE). The lack of resources was also highly variable across divisions sampled. Again, there was no instance within the study sites of a 1:1 ratio for textbooks. The research also identified the current procurement process for textbooks and supplementary materials as being problematic. That is, when the bidding process fails to identify qualifying bidders the process needs to be recommenced and during which time no resources are available except what the Division or schools may purchase independently using local funds or donations. (Baseline Research STRIVE II 2008)

### **1.1 Scope of Framework**

The Framework for LRMDS describes for each system what is required at each level within the Education system to improve access to learning teaching and professional development resources in relation to each of the LRMD systems. That is, the key functions, processes, workflows for quality management and proposes organisational structures for sustainable implementation and management. Decisions as to how the functions are provided are the responsibility of the Region.

## 1.2 Vision for LRMDS

*The provision of adaptive learning resource systems, fully functioning at the region and division levels, effectively developing and distributing adequate and varied learning resources to teachers and learners from both the formal Basic Education and Alternative Learning systems.*

## 1.3 Objectives of LRMDS

The LRMDS is designed to achieve the following objectives:

1. Strengthened Learning Resource development and distribution systems at Regional and Divisional levels.
2. Improvement of instructional and learning materials system through support for the assessment, acquisition, adaptation, development, production and distribution of teaching/learning materials to schools.
3. Digitized available student learning materials (including from PASMEP, PROBE, PRODED, BEAM, TEEP, SEDIP, etc), particularly for reading in the early grades and TLE programs, English, Science and Mathematics in other grades, ADM and ALS.
4. Enhanced provisions of quality instructional and learning materials, particularly in reading in early grades and TLE, English, Science and Mathematics in other grades.
5. Modified and enhanced instructional and learning materials for implementing Alternative Delivery Modes and Learning Systems.
6. Improved development and utilisation of Quality Assurance (including Monitoring and Evaluation) systems for provision and utilisation of learning resources.
7. Development of ICT-enabled solutions in the three regions, integrated with national systems, to support the strengthening of the learning resource support systems.

## 1.4 Education principles

To achieve the objective of enhanced provisions of quality instructional and learning materials, particularly in reading in early grades and TLE, English, Science and Mathematics in other grades, the procurement, production and redevelopment of learning resources (LR), teaching resources (TR) and professional development materials (PDM) is informed by the following principles for 21<sup>st</sup> century quality education for all and in support of the *Millenium Development Goal 2: (MDG2)* <http://www.un.org/millenniumgoals/> and Basic Education Sector Reform Agenda (BESRA).

### **Inclusivity**

The principle of inclusivity requires that selection of resources for cataloguing, redevelopment and reproduction targets resources that are comprehensive and support basic education (elementary, secondary) and non-formal education (ALS) and alternative modes of delivery (ADM). A major priority is to provide for differentiated learning and access needs of all target users. In particular, catering for the needs of learners in multilevel or multigrade classrooms.

The LRMDS catalogue offers choice and flexibility as appropriate to meet the needs of individual aptitudes, abilities, learning styles, and interests. Student learning resources will be structured to scaffold student learning. Professional Development materials and those targeting non-formal education and alternative modes of delivery will apply best practice learning and instructional design based on evidence based research in distance education and adult learning.

### **Learner-centred**

The learner-centred principle requires that student learning resources are activity-based rather than lecture-based. They are designed and or combined with teacher resources to be used by groups of students as in cooperative learning as well as providing for individual learning. The resources are designed to promote use of hands-on activities and an applied approach to learning within the classroom. Learning activities are designed to encourage learners to question, think, react, reflect, and decide in ways that develop critical-thinking and decision-making skills.

### **Access**

The principle of access requires that all learning resources (LR), teaching resources (TR) and professional development materials (PDM) catalogued and or accessed via LRMDS are:

- demonstrating best pedagogical and andragogical practice
- relevant to the needs and expectations of users,
- founded on Filipino values
- accessible to the range of technology available to users,
- usable and functional across highly varied educational settings,
- supportive of alternative modes of delivery, and;
- supportive of students at risk.

### **Engagement in learning**

The principle of engagement requires that redeveloped resources are not merely digitized textbooks but that the design of the learning activity is at the appropriate level (age and academic) for the users. The learning experiences need to be challenging enough but based on a good estimate of the previous understanding of the concepts so that all learners in the profile can extend their understanding.

### **Successful learning**

The principle of successful learning requires that the learning objectives and required learning outcomes are made explicit. Good teaching and learning is underpinned by the learner making meaning of the learning opportunity: knowing what they know and what they don't know. This is achieved by the learning objectives and competencies being made explicit to the learner. Also, wherever possible, the activities include assessments to assist the learner and the teacher to evaluate level and depth of understanding, learning progress and learning needs.

## **2 SCOPE of LRMDS**

The LRMDS system provides access to quality resources from the Regions, Divisions, Cluster/School level: including,

- information on quantity and quality and location of textbooks and supplementary materials, and cultural expertise,
- access to learning, teaching and professional development resources in digital format and locate resources in print format and hard copy,
- standards, specifications and guidelines for:
  - assessing & evaluating,
  - acquiring & harvesting,
  - modification, development and production,
  - storage and maintenance, and;
  - publication and delivery.

A system for quality assurance including continuous monitoring and evaluation will be implemented for each system and at each level to ensure increased access to and use of relevant and improved teaching and learning resources.

Access to LRMDS is limited to schools accredited by DepED, authorized DepED offices (CO, DO, RO) and attached agencies.

### 3 What is the nature of LRMDS resources?

The LRMDS is a web based catalogue and repository of learning, teaching and professional development resources. It functions as a clearinghouse. That is, the LRMDS provides information about the location of resources (hardcopy and softcopy) and allows users of the system to access directly digitized versions of resources that are published and stored within the LRMDS repository. It is also a quality assurance system providing support to DepED Regions, Divisions and Schools in the selection and acquisition of quality digital and non-digital resources in response to identified local educational needs.

#### 3.1 Resource types

**Learning Resources** (LRs) are any digital or non-digital educational resource with a learning purpose. These resources are designed to be used directly by the student learners and or integrated into teacher developed lesson plans.

**Teaching Resources** (TRs) are any educational resource digital or non-digital that supports teachers in curriculum development, delivery and pedagogy or teacher trainers in the delivery of professional development programs.

**Professional Development Materials** (PDMs) are any digital or non-digital education training and development resource or program designed with a training and development purpose. Such programs may contain or reference LRs and TRs.

The LRs, TRs and PDMs:

- i) may be accessed directly from the web based repository and, or
- ii) availability is communicated by the system.

The LRMDS catalogue may also contain information relating to persons that may be accessed to support teaching and learning of local culture through oral traditions, story telling and with indigenous language expertise.

#### 3.2 Resource formats

Resources accessed and located via the LRMDS may be provided in one or more of the following formats:

**Non-digital:** (print based) training and teaching manuals, workbooks, [lesson plan guides](#) (e.g. PROBE, SEDIP materials, BEAM printed Learning Guides), visual aids or reference books.

**Digital:** lesson plan guides (e.g BEAM online), worksheet activity, manipulative & [interactive](#) learning resource, training modules, CD's, videos, DVD and referenced, quality assured websites.

### **3.3 Pedagogical and Andragogical Approach to resource design**

Selection and redevelopment of resources to be catalogued and made available via LRMDS is based on best practices in instructional design. In particular, the approach to selection of resources for redevelopment and design is underpinned by educational quality principles that ensure exploitation of the medium to maximise the opportunity for access and effective teaching and learning in varied educational settings. This approach and application of educational quality principles aims to ensure increased access, engagement and success in learning

#### **3.3.1 Pedagogical Approach**

Learners during the formal years of schooling are learning how to learn. Developing new skills and processes in relation to the domain of knowledge covered within the curriculum and involving increasingly more complex levels of cognition as students progress through schooling. A constructivist approach will be applied to selection and design for redevelopment of resources. Constructivist learning requires changes to learners' experiences. Constructivism asserts that we learn through a continual process of constructing, interpreting and modifying our own representations of reality based on our experiences with reality (Jonassen, 1994).

The learning activities need to help students understand concepts for themselves. This can be achieved by designing learning activities in which students solve new problems, research and integrate information, and create knowledge for themselves.

Constructivism is about challenging ideas. In conjunction with an inquiry- or problem-based approach, this type of pedagogy is invaluable in moving students to a more formal understanding of a particular concept, or way of knowing and doing. (Atkins & Jones, 2004)

#### **3.3.2 Andragogical Approach**

Design of training and professional development programs for adult learners should focus more on the process and less on the content being taught. Case studies, role playing, simulations, and self-evaluation are useful strategies to incorporate in adult training and development programs.

The principles to be applied to the design and development of Professional Development Materials ensures that the:

- learning objectives are explicit
- programs are self paced and support self directed learning
- activities provide opportunity for the learner to connect and build on prior experience
- programs are relevant to and support professional and vocational growth.

## **4 Acquisition and Procurement**

Acquisition and procurement of resources may occur through the following processes:

**Commissioned** resources are comprised of LRs, TRs and PDMs that have been developed or procured to meet the specific requirements of DepED curriculum design, development and delivery. This material may be new content, specifically commissioned content, or existing content that has been modified to meet the needs of DepED. These materials may be derived from:

- material produced by DepED or foreign funded projects that needs to be digitised to make it available to teachers and students

- new material designed and developed in accordance with identified teaching and learning needs
- teacher developed resources.

*Design and development:*

Resources may be designed and developed in direct response to an identified teaching and learning need. School AIP, SIP and SRC will be the initial point of reference by divisions and regions to identify specific gaps in resource provision.

Where new content is to be designed and developed the Regional LRMD team has direct responsibility for development, production and quality assurance. The decision to produce the material in-house or to out-source development and production will be determined on the basis of cost effectiveness.

Appendix 3 contains an initial list of existing DepED and foreign funded project resources targeted for redevelopment.

**Non-commissioned** resources refers to teaching, training or learning content contributed or licensed via third-party agents, such as cultural institutions, government departments, not-for-profit organisations, or commercial publishers. This material may be:

- licensed and procured existing content that can be used in its current state (online objects/packages; CDs, DVD, video, print)
- licensed and procured existing content that needs to be modified (online objects/packages; CDs, DVD, video, print)
- licensed and procured material that needs to be digitised to make it available to teachers and students.

**Public Private Partnerships (PPP)**

There are many public and private agencies, organisations and institutions that produce or are able to support the production of high quality educational material.

DepED may establish public-private partnerships through collaboration with higher education institutions, cultural organisations, non-government organisations and commercial providers to cost effectively increase the range and access to quality educational materials.

At the most simple level existing publicly available quality repositories and educational portals of educational content can be evaluated by the LRMD Administration Team (Region) and referenced and catalogued for including in the online LRMD catalogue.

More sustained partnerships may be established by direct collaboration with higher education institutions responsible for teacher education, cultural organisations and NGOs with education objectives. Similarly, publishers and providers of information communication technologies may be approached to support provision of learning resources, equipment or training.

**5 Standards and Specifications for LRMD**

For sustainability to be achieved, establishment, implementation and operation of the LRMD must be underpinned by the consistent application of monitored standards and specifications.

A standards based system will ensure ongoing interoperability, accessibility, scalability and extensibility.

Within LRMDS each standard and specification designates key performance criteria in relation to the quality characteristics. Each consists of quantitative and qualitative elements. Thus a concept of 'reasonableness' on balance is used in the application of the criteria and applied throughout the quality assurance processes at the various levels of the system.

The requirements for each commissioned or non-commissioned LR, TR or PDM will be based on the version of specifications at the time the resource is procured. To a degree, the requirements are an interpretation and application of standards and measures within a specific context at a particular point in time. Periodic reviews and maintenance schedules for the systems and contents are required to support sustained implementation.

Published specifications, procedures, guidelines, indicators, templates and tools are provided to support implementation of the LRMDS. These instruments are used by various personnel involved in quality assurance at different levels within a region, division or by the cluster/school.

An overview of the scope of each of the specifications is provided in Table 1. The actual specifications are published separately and monitored, evaluated and revised by Central Office Teaching and Learning Resource Management and Coordinating Unit. As such these specifications are informed by DepED Central Office policy, standards and guidelines.

The LRMDS specifications cover:

- 1 A. Educational requirements
- 2 B. Technical specifications for content development
- 3 C. Rights management
- 4 D. Accessibility
- 5 E. Metadata (discovery, management and maintenance).

## 5.1 Why do we need specifications?

Standards and specifications along with documented guidelines are provided to ensure, that all resources available are of a high quality and educational value. Importantly, they are deemed fit for purpose, easy to access and use. Large scale, distributed systems with multiple users require consistency and coherence in organisation, management and maintenance if such systems are to be sustained.

### 5.1.1 What specifications are required for LR, TR and PDM production, modification and procurement?

The specifications for LR, TR and PDM production, modification and procurement define the educational and technical attributes required for access and use.

The following specifications are developed and available from the LRMDS system. The LRMDS Regional Manager is responsible for keeping the standards and specifications up to date and for communicating changes to all LRMDS users.

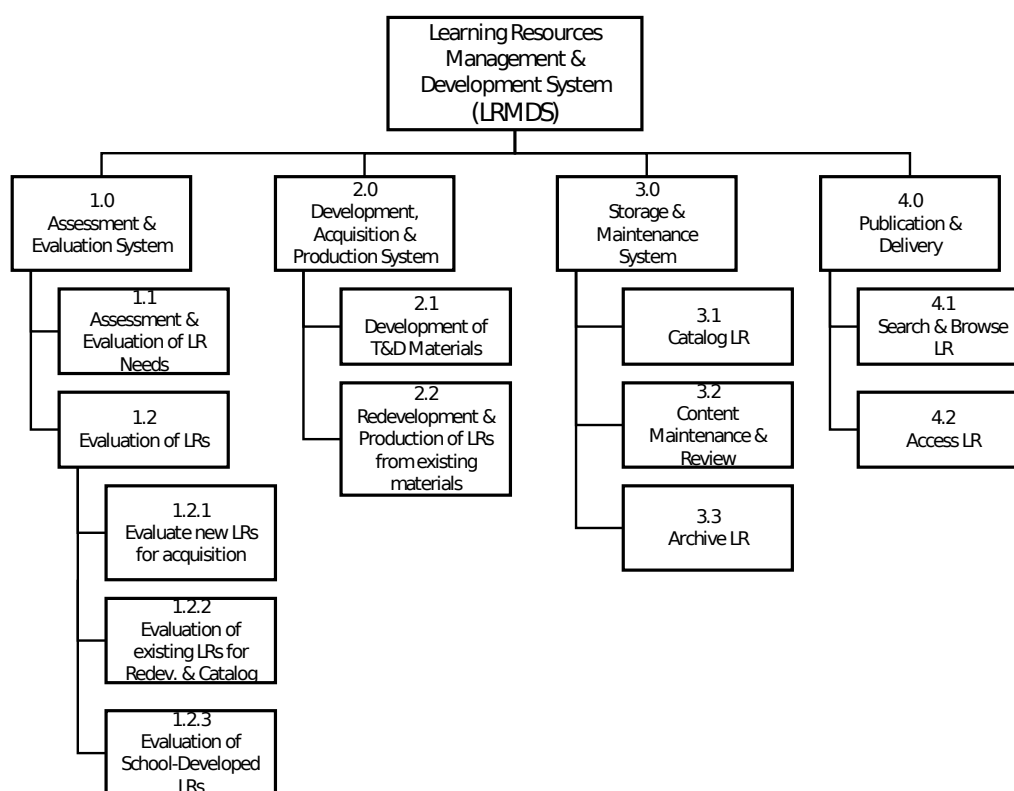

**Table 1: Specifications**

## 6 The Learning Resources Management and Development System

The Learning Resources Management and Development System comprises four integrated sub-systems designed to support increased distribution and access to learning, teaching and professional development resources at the Region, Division and School/Cluster levels of DepED. The LRMDS serves as one component of the Integrated Multi-layered School Based Management System (IMSS). The IMSS functions to serve and respond to the needs of schools at the division and regional level.

The Integrated Multi-Layered SBM System (IM\_SS) (Appendix 1) is a three-dimensional matrix that defines the critical education processes by way of identifying:

- Functions & responsibilities,
- Appropriate organizational structure,

- Processes and mechanisms, and;
- Process tools,

within the various levels (school, division, region & central offices) and strands or management areas of the education system. The IMSS illustrates the relationship of these system elements in terms of:

1. Vertical alignment of critical processes and responsibilities at the various DepED levels (school, division, region & central office)
2. Integration of the responsibilities, structures, processes across each area of education management

The LRMDS is managed and maintained by the Region in accordance with requirements of DepED Central office for distribution and access to resources. It is responsive to identified school learning and teaching resource needs and supports divisions via the regions to fulfil these needs.

The LRMDS is manifested as an online networked information and communication system connected at each level to physical facilities including, libraries, media production and development centres coordinated by Administration & Management and QA teams.

## **6.1 System for Assessment and Evaluation**

The Assessment and Evaluation system for identification of materials to be procured, redeveloped or reproduced is designed to support schools, divisions and regions:

- in identifying learning, teaching and professional development resource needs
- reviewing and recommending resources for acquisition and procurement
- identifying existing resources for reproduction
- evaluating teacher developed materials for local use and shared distribution via LRMDS

## **6.2 System for Development, Acquisition and Production**

The Development, Acquisition and Production system is designed to support local development and or production of learning, teaching and professional development materials by the regions and divisions via the LRMDS. The system is designed to:

- support local design and redevelopment of existing learning and teaching resources by the region in response to identified needs of schools
- develop on behalf of Regional NEAP training and development resources and or PDMs for distribution via LRMDS
- support modification and translation of resources into mother tongue.

## **6.3 System for Storage and Maintenance**

The Storage and Maintenance system is designed to ensure ongoing and sustainable access to quality learning, teaching and professional development resources via the LRMDS. The system comprises:

- the online catalogue of all quality assured resources that are stored in the LRMDS repository, available from online sites and locates hard copies of resources stored at regions, divisions and or schools/cluster levels

- content maintenance and review schedules and processes to ensure ongoing technical and educational fit for purpose
- archiving services

## 6.4 System for Publication and Delivery

The Publication and Delivery system is designed to provide the web based user interface to access the LRMS. It is designed to support user:

- Search, Browse, View and download resources and information contained within the repository
- Authentication for access and use of third party material licensed to DepED

The specific workflows associated with each subsystem are described in Section 7.

## 6.5 Functions, processes and structure to support effective implementation of LRMS at each level.

### 6.5.1 Central Office

The specific functions and processes required of Central office to support effective implementation of LRMS to improve access to learning, teaching and professional development resources by schools is described in Table 2.

Table 2: LRMS Central Office requirements

<i>Function</i>	<i>Processes</i>	<i>Process Tools</i>	<i>Structure</i>
<p><b>1. Sets policies, guidelines, standards and specifications on:</b></p> <p>1.1 Procurement, selection and prioritization, adoption, production, distribution and utilization</p> <p>1.2 Development of digital and print materials</p> <p>1.3 Resource requirements for the curriculum</p> <p>1.4 Evaluation</p>	<p>Publishes standards specifications procurement of digital and non-digital resources.</p> <p>Develops, publishes and reviews curriculum standards and competencies</p>	<p>Assessment and evaluation guidelines and criteria</p> <p>Procurement guidelines and processes</p> <p>Intellectual property rights and copyright</p> <p>Minimum technical requirements</p> <p>Published curriculum</p>	<p>Teaching and Learning Resource Management and Coordinating Unit headed by Assistant Secretary</p> <p>ICT Specialists</p> <p>Technical evaluators</p> <p>Curriculum specialists</p> <p>Subject area specialist</p> <p>ICT technicians</p> <p>Database management (EMIS)</p> <p>Special consultants</p> <p>LRM policy coordinator</p>

<b>2. Provides current list of approved LRs/ TR/PDMs for procurement (IMCS)</b>	Trains evaluators in using instruments for evaluation of resources (Region and Division)	IMCS evaluation guidelines and criteria for evaluation of IMs  Evaluator training programs	IMCS  NEAP
<b>3. Networks with various stakeholders for resource mobilization</b>	Identifies potential agencies and organisations	Protocols for establishment of public-private partnerships	
<b>4. Monitors &amp; Evaluates compliance to policies and impact of learning materials</b>	Access and Usage  Quality of resources  Gap analysis	Survey instruments    Reporting templates	

### 6.5.2 Region

The specific functions and processes required of the Regional office LRMDS facility to support effective implementation of LRMDS to improve access to learning, teaching and professional development resources by schools is described in Table 3.

**Table 3: LRMDS Regional Office requirements**

<i>Function</i>	<i>Processes</i>	<i>Process Tools</i>	<i>Structure</i>
<b>1. Manages implementation of policy, standards, specs from CO for LRMDS Clearinghouse</b>	Publishes specifications, guidelines and criteria for access by Region, Division & school  Trains supplementary materials coordinators  Publishes specifications,	Learning Resource Plan  Assessment and evaluation criteria and guidelines published.	LRMDS Administration & Publication Group: Librarian, subject matter experts, IT support- web manager; IPR Coordinator

<b>Function</b>	<b>Processes</b>	<b>Process Tools</b>	<b>Structure</b>
	<p>guidelines and criteria</p> <p>Identify and equip all personnel involved with LRMDS</p> <p>Implementation process</p> <p>Reg. Plan REDP</p> <p>LR plan for procurement, development and production based on identified needs</p>		
<p><b>2. Monitoring and evaluation; Monitors the LRMDS operation and evaluates its effectiveness</b></p>	<p>Monitors and reviews policy for identification of policy gaps</p> <p>Monitors standards and specifications for resource catalogue, development and production</p> <p>Monitors that the LRMDS is providing materials to meet local needs</p> <p>Undertake specific evaluation task to determine the usefulness of LRMDS and resources</p> <p>Monitors that the operation of the LRMDS are based on set standards and procedures</p> <p>Model for M&amp;E for the region</p> <p>Consolidation of DEDP for possible incorporation in the REDP</p>	<p>QA conformance and compliance checklists and guidelines for all specifications</p> <p>User survey published</p> <p>Reporting on access and downloads</p>	<p>LRMDS Administration &amp; Publication Group</p> <p>QA Team: Technical analysts, online editor, subject matter experts, T &amp; D.</p>
<p><b>3. Assessment &amp; Evaluation System for identification of materials to be procured or produced within the region</b></p>	<p>Guidelines for Assessment and Evaluation of resources published and available in LRMDS</p> <p>Identification &amp; communication of supplementary materials that can be purchased by schools using public funds</p> <p>Selection of materials needed locally</p> <p>Assess against national criteria</p> <p>Acceptance/rejection for local use</p>	<p>Assessment and evaluation criteria checklists:</p> <p>School</p> <p>Division</p> <p>Region</p> <p>Criteria, guidelines and rubrics to evaluate digital and non-digital resources</p> <p>Checklist of materials</p> <p>Survey forms</p> <p>Questionnaire</p>	<p>LRMDS Manager and Administration Team</p>

<b>Function</b>	<b>Processes</b>	<b>Process Tools</b>	<b>Structure</b>
<b>4. Development &amp; Production (new and &amp; re-development)</b> <b>create, redevelop modify resources</b>	Specifications and standards published Modification and indigenization guidelines Development guidelines QA reviews: design, development, conformance Develop locally needed materials that are not in the national list nor available locally Redevelop/modify existing materials to meet local need Produce locally made materials Reproduce existing materials	Standards and specification indicators and guidelines Request/ Job orders for (outsourced) production Design Brief and Specification template; Functional specification template; Procedure for conformance testing	LRMS Development Team Production & development unit – full facility: desktop publisher; multimedia programmer; graphic artist, project manager. LRMS QA Team Editors, subject matter specialists
<b>5. Production of PDMs and T and D materials</b>	Coordinate with Reg NEAP to review and assess design requirements Develop alpha/beta version of PDMs and forward to QA for final review Develop alpha/beta version of LR and forward to QA for final review Test LR and prepare QA Test Report	T & D request for T&D Materials Development (PDMs) Design Brief Template and Design Specs for the T&D Material and includes all content (including suggested or specific graphic arts or media Development and production QA Editorial, technical, educational, IP checklists and guidelines QA Review procedures	LRMS Administration & Publication Group Project Manager LRMS Development Team LRMS QA Team
<b>6. Storage &amp; Maintenance</b>	Review specifications annually (part of M&E) QA for all LRMS updates (part of M&E) Manages and maintains LRMS	QA Guidelines and checklist: Publication Archiving Redevelopment Digital Library	LRMS QA Team
<b>7. Publication &amp; Delivery</b>	Map LR, TR, PDM to curriculum Apply metadata Catalogue	Metadata specification Publish checklist	LRMS Manager and Administration Team

<b>Function</b>	<b>Processes</b>	<b>Process Tools</b>	<b>Structure</b>
<b>8. Financial management</b>	Budget allocation for LRMDs operation and maintenance	Networking and linkages with prospective funding agencies  MOOE allocation	Regional Director LRMDs Manager
<b>9. Manage access and use across Regions, Divisions</b>	T & D for LRMDs developed and conducted at region: Education Supervisors I, PS District Supervisors, and Division Subject Area Specialists	Training program for access and use of LRMDs  Training program for resource reproduction, re-contextualisation at region level	LRMDs Manager and Administration Team

### 6.5.3 Division

The specific functions and processes required of the Division LRMDs facility to support effective implementation of LRMDs to improve access to learning, teaching and professional development resources by schools is described in Table 4.

**Table 4: LRMDs Division Office requirements**

<b>Function</b>	<b>Processes</b>	<b>Process Tools</b>	<b>Structure</b>
<b>1. Provides access to LRMDs</b>  1.1 Implements use of LRMDs	Online access to LRMDs  Catalogue of resources maintained.  Library		Library/LRMDs manager/coordinator
<b>2. Integrates and or modifies content for local context/needs</b>	Division/School generated resources subjected to Region A&E for inclusion in the LRMDs/Library  LR, TR/PDMs developed and reproduced for local use.  Create and maintain pool of writers/experts (training)  Assess local needs for localization  Training of writers translators etc.	facility to support copy, re-contextualization, indigenization & localization  Indigenization and localization guidelines for reproduction of materials  Training programs for Division ICT team	QA Production Team
<b>3. Monitors and evaluates</b>	Reports to Region access, use, redevelopment (as above) and requests for LRMD updates  Model for M&E for LRMDs  Review of SIP/AIP re:LR plan	Usage survey instrument  LR Plan and AIP/SIP  Schools and classroom visitation  Focus Group Discussion  Survey tools	QA Team and LRMDs Manager

<b>Function</b>	<b>Processes</b>	<b>Process Tools</b>	<b>Structure</b>
	Consolidation of LR Plans in the DEDP		
<b>4. Provides information and training on LRMDS function and services</b>	<p>Training of school heads and subject supervisors/teachers</p> <p>Capacitate school heads to conduct in-school training for teachers</p> <p>Training for district supervisor</p>	Training program for access and use of LRMDS	LRMDS Administration & Lib hub
<b>5. Advocacy</b>	<p>Information dissemination</p> <p>Coordination with stakeholders</p>	Advocacy and information dissemination program/campaign materials	Division Superintendents

#### 6.5.4 Cluster/School

The specific functions and processes required of the Cluster/School to support effective implementation and use of LRMDS to improve access to learning, teaching and professional development resources by schools is described in Table 5.

**Table 5: LRMDS Cluster/School requirements**

<b>Function</b>	<b>Processes</b>	<b>Process Tools</b>	<b>Structure</b>
<p><b>1. Provide universal access to LRMDS</b></p> <p>1.1 Schools to provide access to all Learning resources via the LRMDS</p> <p>1.2 Schools should provide access to teachers and students to LRs through the LRMDS</p>	<p>Identify LR Needs Cluster schools according to distance</p> <p>Review existing LR in school and LRMDS and identify gaps &amp; priorities</p> <p>Secure LRs from Region, Division, and other sources (GOs/NGOs) for school utilization</p> <p>LRC as Community Learning Center for ALS, as repository of LRs for Elementary and Secondary Levels</p>	<p>LR Plan integrated with SIP/ AIP/SRC</p> <p>Search, Browse, download, bookmark</p>	<p>LR Committee:</p> <p>Principal, teachers, parents, ALS, CLC representatives</p>
<b>2. Use content and integrate for teaching and learning</b>	Download and copy digital or print resources	<p>Lesson plan template</p> <p>Modules for ALS</p> <p>EASE Modules (Sec.)</p> <p>Learning Package</p>	Subject supervisor, Teacher, CLC,

<b>Function</b>	<b>Processes</b>	<b>Process Tools</b>	<b>Structure</b>
		(Elem.) Supplementary LRs	
<b>3. Teacher-developed materials:</b> (Relevant & Indigenization and Localization) Digital subject to A&E at Region Non-digital A&E may be at the Division	Develop materials to support teaching and learning Review teacher develop material	LR A & E school checklist for submission Submission template for Division/Region QA Rubrics/Criteria/Standards and specifications: for local production of materials in Mother Tongue Materials Evaluation Guidelines	LR Committee: Principal, teachers, parents, ALS, CLC representatives

## 7 LRMSD Workflow Process overview

The LRMSD consists of four integrated sub-systems. Each system is designed to support increased access to LR/TR/PDM materials by School/Clusters, Divisions and Regions.

### 7.1 Assessment and Evaluation System

#### 7.1.1 Assessment and evaluation of LR, TR and PDM needs

The assessment and evaluation of LR, TR and PDM need is a responsibility of all levels. **Schools/Clusters** develop as part of the SIP and AIP a Learning Resource Plan using the LR Plan Template. This plan identifies areas of school level need for LR/TRs in relation to:

- Underachievement – test results
- Competencies – teacher capacity in subject area and pedagogy
- Resource gaps across subject and year levels
- Indigenization requirements
- Alternative modes of delivery
- Support facilities for use of resources at the school level.

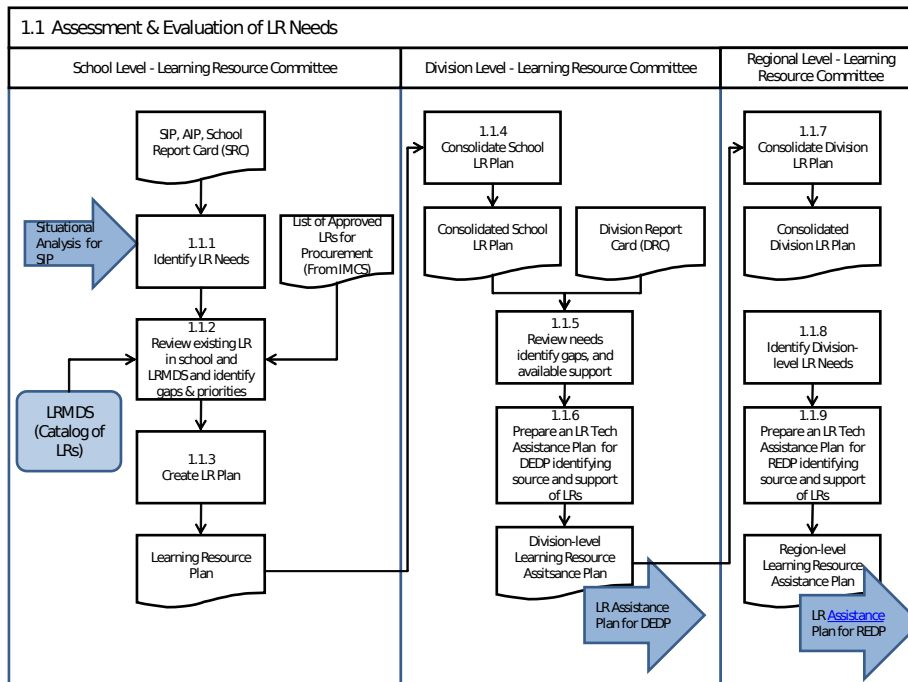

The LR Committee established at the school/cluster level conducts, completes and submits the LR Plan to the Division in conjunction with the AIP, SIP and SRC process.

The **Division** consolidates the School/cluster LR Plans and develops an LR Assistance Plan for DEDP. This identifies areas of need and proposes sources of support and acquisition of resources as per Supplementary lists of approved materials, recommendations for reproduction of LRs at the Division and or requests for modification of existing resources and procurement or for development and production of new resources by the Region LRMSD.

The **Region** Learning Resource Committee reviews and consolidates the LR Assistance Plans for DEDP and develops a REDP to support procurement and production of LR/TRs for inclusion in the LRMSD. See Diagram 1.1.

**Diagram 1.1 Assessment and evaluation of LR, TR & PDM needs at each level**

### 7.1.2 Evaluation of new learning resources for acquisition/procurement

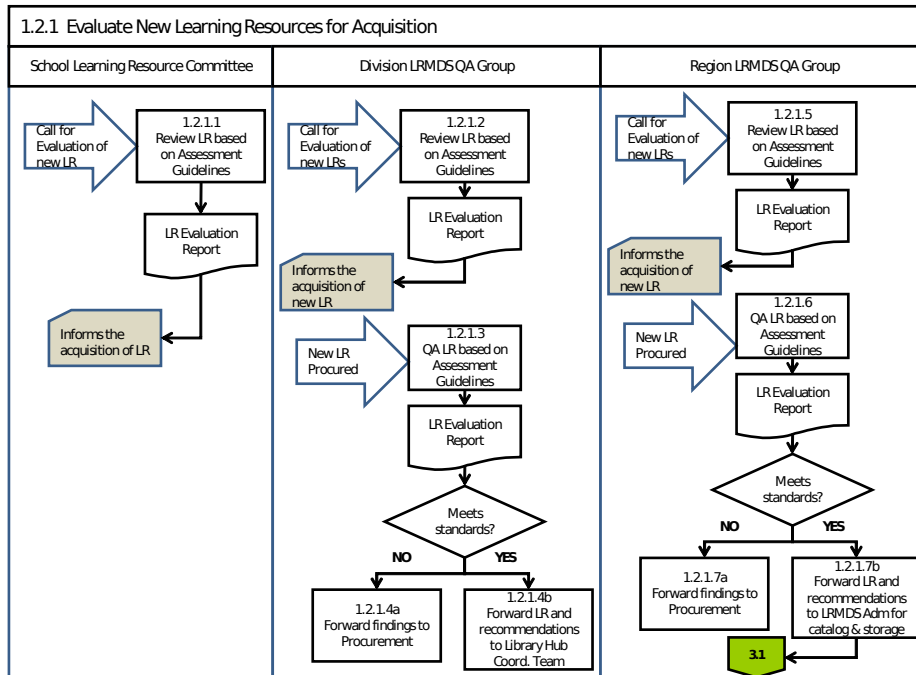

Evaluation of new learning resources for acquisition/procurement (Diagram 1.2.1) is conducted at the School/cluster level by the School Learning Resource Committee and at the Division and Regional levels by the QA Team at these levels.

Schools may use the assessment and evaluation criteria to select and acquire Learning Resources using local funds. They may also access the list of IMCS approved supplementary materials and procure these from local funds. Schools/clusters may also assess and evaluate LR/TRs and provide an evaluation report to the Division to request acquisition and inclusion in LRMDS.

The Division will review submitted LR Evaluations for acquisition of new resources and will determine whether to acquire for distribution via the divisional Library hub. Cataloguing of the acquired resources within LRMDS is the responsibility of Regional LRMDS. Divisions will forward recommendations and notification of acquisition of new LRs/TRs where these are to be discoverable within the LRMDS.

The Region reviews the Division LR Evaluation recommendations for acquisition and will a) catalogue the resources being acquired at the Division level and or b) procure the LRs/TRs for inclusion in the LRMDS and cataloguing.

Diagram 1.2.1

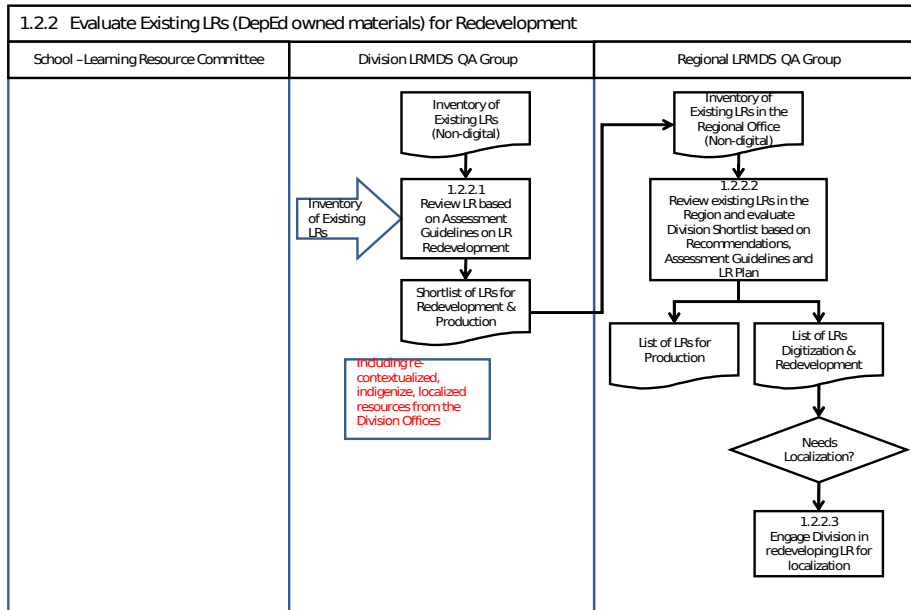

### 7.1.3 Evaluation of existing resources for reproduction

The LRMS contains an inventory and catalogue of all existing LRs/TRs/PDMs. The LRMS catalogue locates and provides information on the location and access to these resources. Through the process of identification of needs, (Diagram 1.1) the Regional LRMS QA Team will evaluate Division shortlists and determine which resources will be reproduced (as is) and which resources will be redeveloped, modified and digitised.

The final list of LRs/TRs/PDMs identified for reproduction is submitted to the Division for production and distribution to library hubs, clusters/schools. Diagram 1.2.2.

Diagram 1.2.2

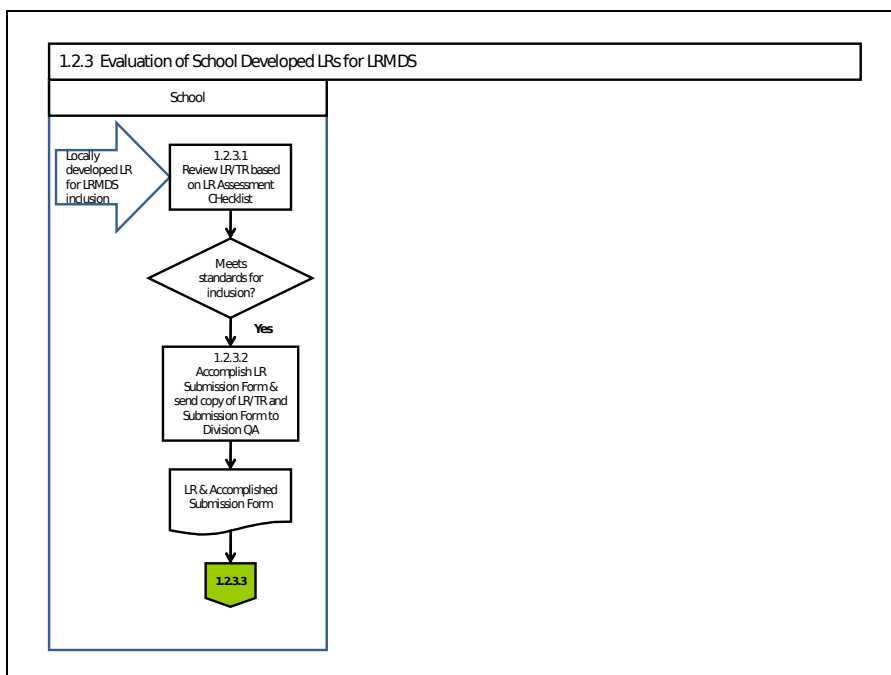

### 7.1.4 Evaluation of teacher developed materials

At the School/cluster level teachers develop LRs/TRs for classroom and local training use. Teacher-developed materials may be digital or non-digital. These materials may be included in the LRMS catalogue and or redeveloped for inclusion in the LRMS.

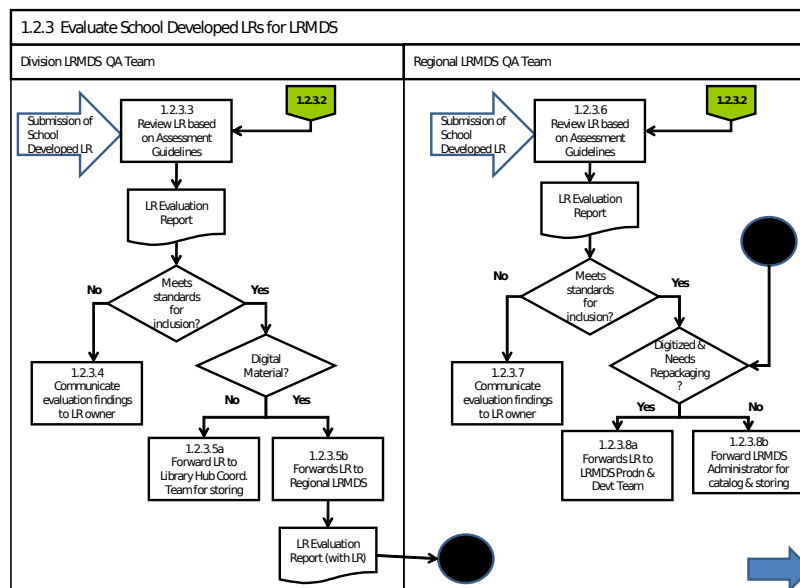

All digital LR/TR/PDMs (Diagrams 1.2.3a and 1.2.3b) must undergo assessment and evaluation via the School, Division to Region. See Diagram 1.2.3b. Digital resources identified and accepted by the Regional LRMS QA team for inclusion in the LRMS will be catalogued, and reproduced and or redeveloped by the Region.

Non-digital teacher developed materials undergo assessment and evaluation by the Division LRMS QA Team.

Diagram 1.2.3a

**Diagram 1.2.3b**

## 7.2 Development, acquisition and production

In the first instance the materials designated for acquisition, development and production for access and distribution via the LRMDS will comprise Training and Development materials (TRs/PDMs) and existing LRs owned by DepED. Development and production of new LRs/TRs will be in response to School/Division needs analysis.

### 7.2.1 Training and Development Materials

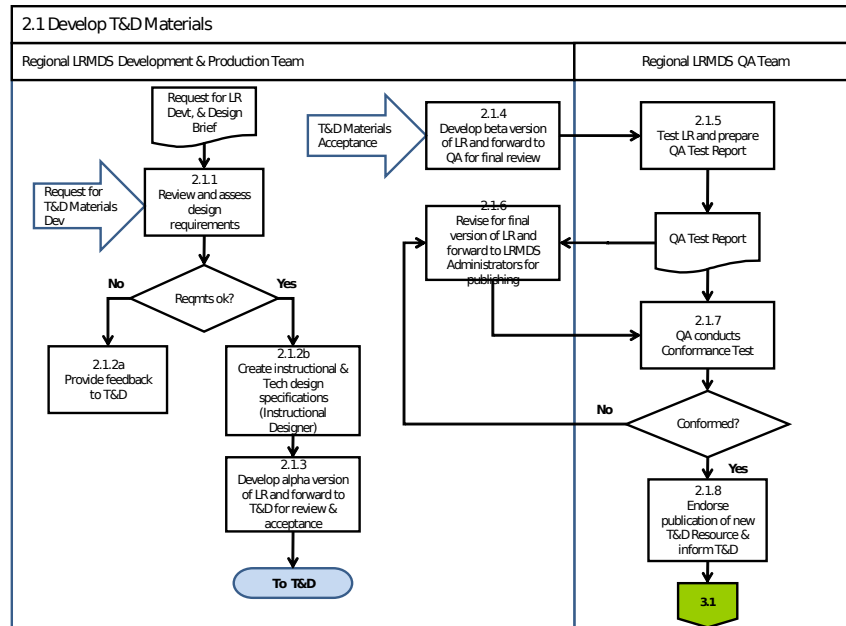

Training and Development Materials comprise all materials including templates used for training needs assessment, training modules, and professional development materials for access and reference.

The LRMDS Development and Production Team at the Region is responsible for production of new and reproduction of existing materials for access via LRMDS by the Regions, Divisions and Schools. Refer to the DRAFT Training and Development Framework 2008.

Under NEAP at the Region training materials are designed. The Training and Development Team provides a request to LRMDS for materials development. Acceptance of the request requires the submission of a completed Design Brief and Specifications template. This contains all content including suggested or specific graphics, art and media.

The LRMDS Development and Production team prepares an instructional and technical design specification and develops alpha version of the resource. The alpha version is reviewed by Training and Development and LRMDS QA. The QA review outcomes are incorporated into the production of the beta version. The beta version is reviewed by T and D and LRMDS QA team. Following acceptance of the beta version and documented modifications a final Conformance version is created for final QA and publication. See Diagram 2.1.

**Diagram 2.1**

Any resource that has been digitally produced (new or modified existing resource) and is to be distributed and accessed directly from the LRMS system is required to be package in accordance with LRMS Storage, Distribution and Cataloguing specifications and standards.

When a resource is ready to be published it is uploaded and packaged for storage in the LRMS repository. See Diagram 3.1.

### 7.2.2 Reproduction and Development of Existing LR/TRs/PDMs (DepED)

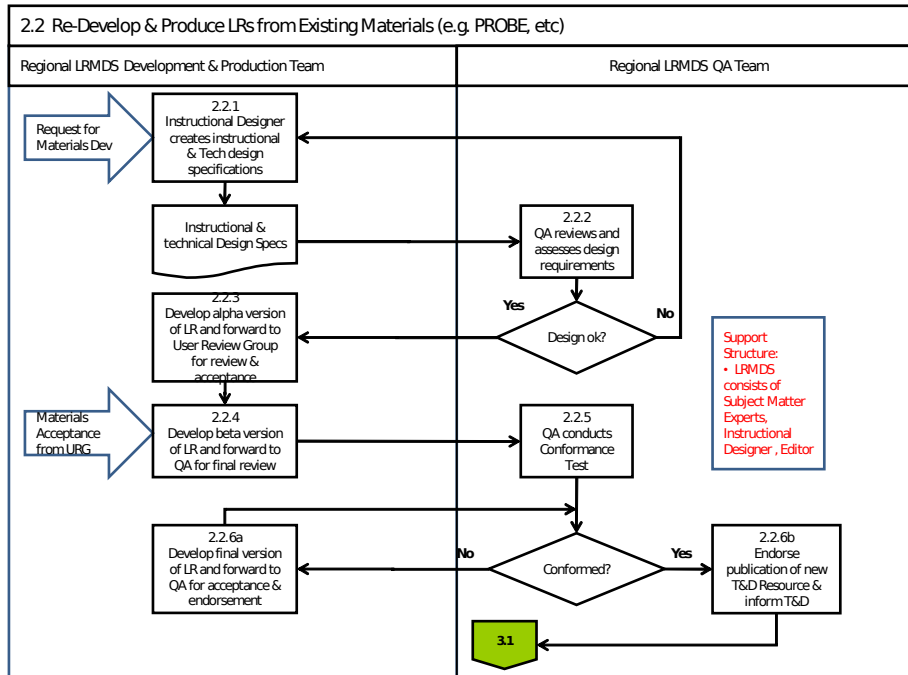

Existing resources identified via School/Division/Region needs analysis (LR plan, DEPD, REDP) and targeted for supporting increased access via LRMS will be reproduced by the Regional LRMS Development and Production Team.

The LRMS Instructional Designer develops an Instructional and Technical Design and Specifications for the redevelopment of the resource. The LRMS QA Team reviews the proposed design and development specification. If approved an alpha version of the material is produced and reviewed by a designated User Review Group.

Review feedback is incorporated into the beta version of the LR/TR and forwarded to QA for final review and conformance testing.

Once approved for publishing the LR/TR/PDM is stored and packaged, catalogued and published in LRMS. See Diagram 2.2 and 3.1.

Diagram 2.2

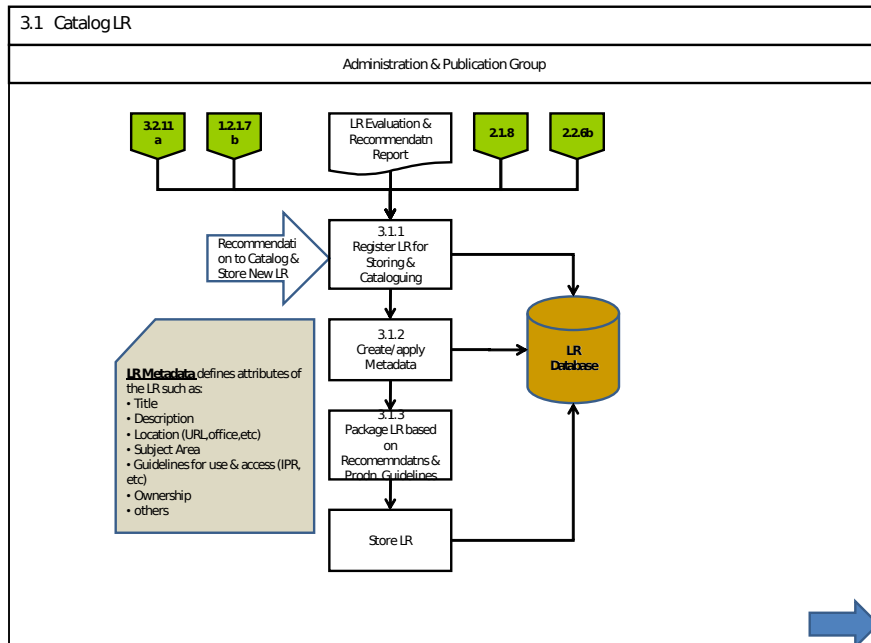

### 7.2.3 Storage and maintenance system

All content (LR/TR/PDMs) digital and non-digital that are to be located via the LRMSD are catalogued. (Diagram 3.1) The Regional Administration and Publication Group have responsibility for cataloguing all resources using agreed metadata specifications.

LR/TR/PDMs evaluation and recommendations for cataloguing within LRMSD may be derived from School and or Division assessment and evaluations relating to existing DepED materials, newly developed resources, and modified resources. In all instances, the addition to the LRMSD catalogue is the responsibility of Regional Administration and Publication Group.

The Administration and Publication Group reviews the recommendations for the LR/TR/PDM to be catalogued. Cataloguing requires metadata to be applied to the resource prior to publication.

Diagram 3.1

### 7.2.3.1 Content review and maintenance

The conduct of content review and maintenance (Diagram 3.2a) is a continuous process managed by the Regional LRMDS QA and M&E Team. Content reviews are triggered by:

8. Reported content faults,
9. Changes to system standards and specifications, and;
10. Usage reviews.

#### 1. Reported content faults

Reported content faults may be derived from any users of the LRMDS system. A content fault/issue report template is completed and sent to the Region LRMDS Manager. Content faults or issues may relate to educational integrity, technical functioning, and intellectual property/copyright infringement. All issues are investigated and the severity of the issue determines whether the resource is withdrawn prior to fixing or is listed as requiring action during the schedule of periodic review and maintenance. Withdrawn resources are communicated to LRMDS Administration and Publication and are archived. (Diagram 3.3)

#### 2. Changes in System standards and specifications

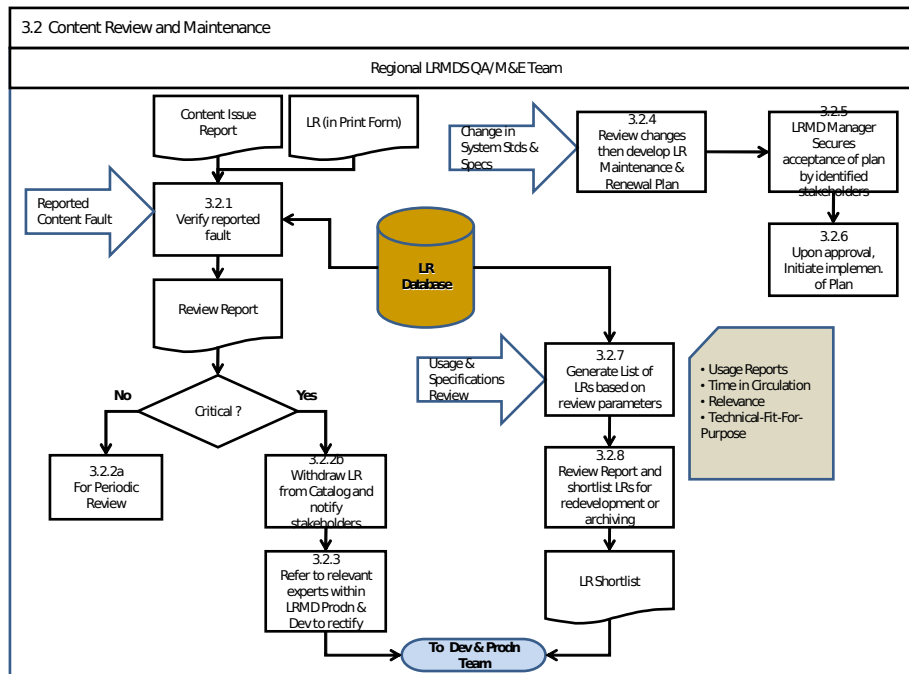

Changes in System standards and specifications will usually result from decisions at Central office to modify or update curriculum frameworks, educational standards or technology advances (software and hardware). These are system wide changes and therefore require the identification of the quantity of resources requiring modification to conform. A maintenance and renewal plan is developed by the Regional LRMDS QA Team and provided to the Regional LRMD Manager for approval and communication to stakeholders.

#### 3. Usage reports

Usage reports are a combination of system checks for monitoring access and download and LRMDS M&E commissioned annual review reports from Schools/clusters and Divisions. Usage reports cover time in circulation, relevance, technical fit for purpose, and may include some recommendations for localisation and or indigenisation.

Any resource requiring redevelopment is reported to Regional LRMS Development and Production Team. Resources identified for archiving are communicated to the Administration and Publication group.

Diagram 3.2a

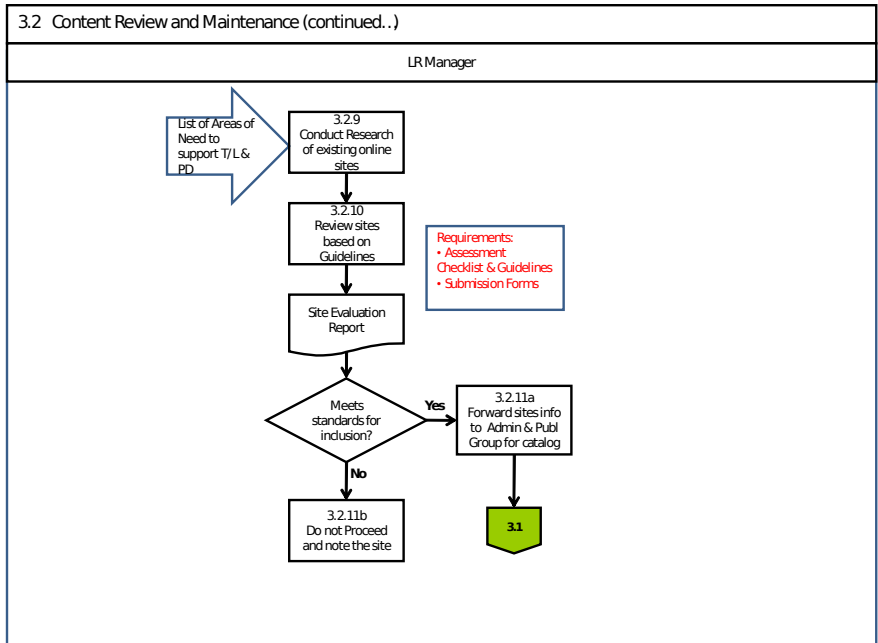

### 7.2.3.2 Content reviews and maintenance of online links to external repositories

The LR Manager is responsible for monitoring the catalogue of resources and to continue to research and review other open access sites for integration in to the LRMS system and catalogue. (Diagram 3.2b) A site review evaluates the site content and links for educational quality, copyright and conditions of use, safety and security in relation to authenticity and integrity of providers. A site evaluation report is provided and if the site is suitable for cataloguing the Administration and Publication Group adds the reference URL to the catalogue with associated metadata. Sites deemed unsuitable are recorded. Reference URLs catalogued in the LRMS are subjected to the same review and maintenance processes as described above.

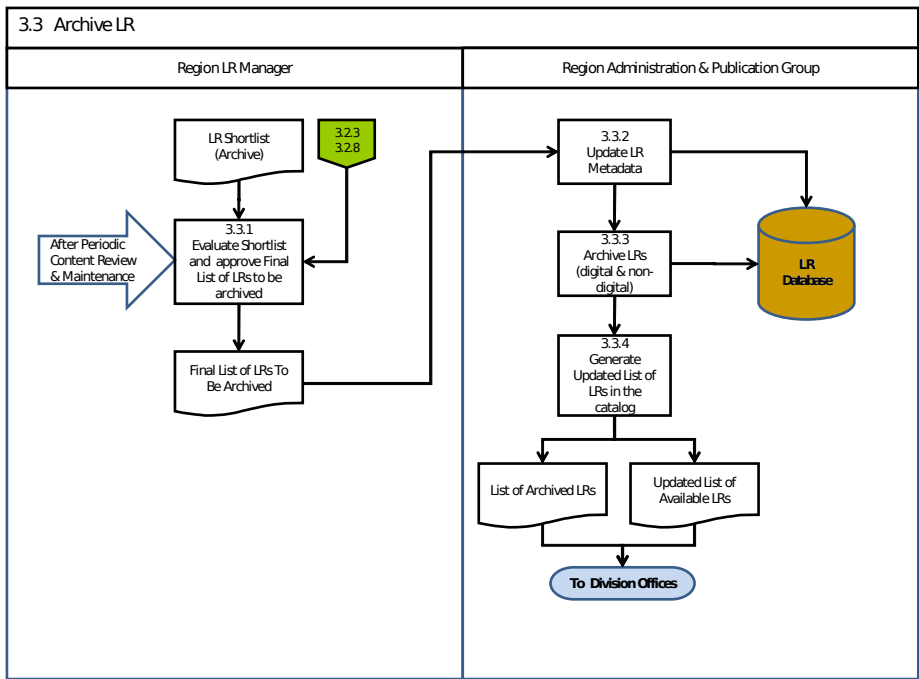

Diagram 3.2b

**7.2.3.3 Archive Resources**

After the periodic review is completed any resources that are targeted to be withdrawn from the system are archived. (Diagram 3.3) In some instances a resource will be withdrawn permanently and archived. For example the review process has resulted in identification of a major content error. In other instances the current version of the resource is withdrawn and archived. A new version will be developed and published. When any resource is archived the Catalogue is updated and lists of archived resources are communicated to Divisions and Schools.

Diagram 3.3

## 7.3 Publication and Delivery

### 7.3.1 Access LR

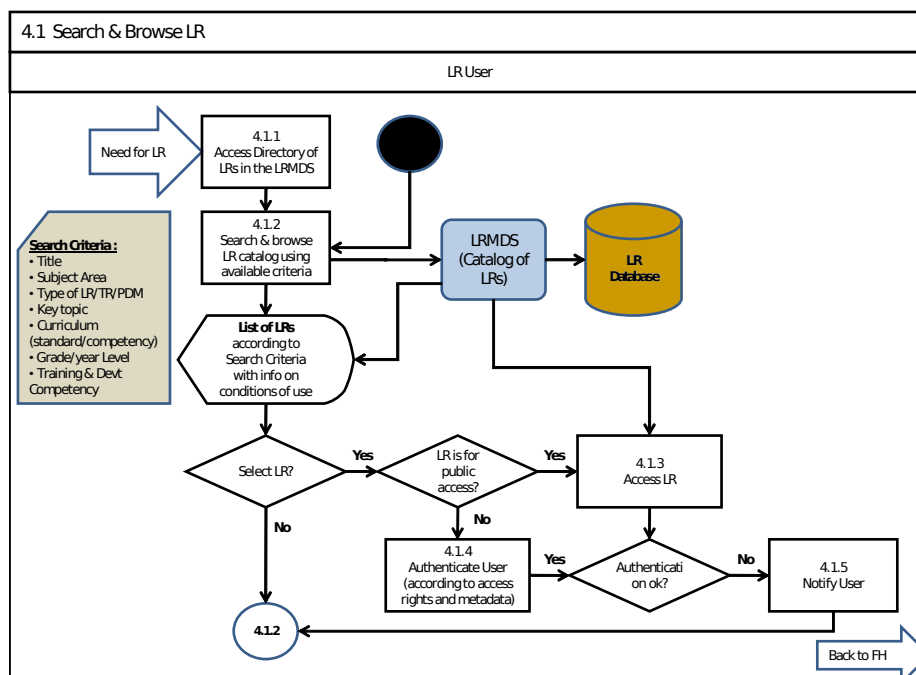

All catalogued and published resources can be located and or accessed via searching the online Catalogue. The metadata that describes each resource is searched by the user. The search and browse facility of the online catalogue may be queried (searched) via:

- Title
- Subject Area
- Type of resource - LR/TR/PDM
- Key topic
- Curriculum standard/competency
- Grade/year Level
- Training & Development competency (NCBTS)

The system for searching and browsing is publicly available. (Diagram 4.1) Open resources comprise DepED owned materials and referenced public online materials. However, all users are required to be authenticated to access the resources that contain third party copyright content before viewing or download. Regular subscribers to the LRMSD will be registered and authenticated.

All resources will contain copyright information and conditions of use. This information is communicated to the user via the list of search results and at the point that the resource is accessed for viewing or download.

Diagram 4.1

## 8 Proposed base level Facilities and Equipment (Central Office, Region, Division, Cluster/School, Library hub, Community Learning Centre)

Table 6 Facilities and equipment.

Central Office	Facilities,	Equipment,	Infrastructure

## 9 Proposed base level Organizational Structures

The LRMDS is located, managed and administered by the Region. The content repository and catalogue is maintained at this level. The LRMDS Administration and Publication Group manage and maintain the system. Development, production and publication of resources including cataloguing of non-digital resources that are referenced in the system is managed at this level.

### 9.1 Central Office

**Table 8 Organizational Structure for LRMDS**

Structure	Function	Roles & Responsibilities	Human Resources
Teaching & Learning Resource Management and Coordinating Unit	Sets policies guidelines, standards and specifications for: Procurement Development Evaluation Promotion Resource mobilization Provision of current list of approved/ recommended LRs/TRs/PDMs	Publication of policies guidelines, standards and specifications Provides models for innovation in learning resource design and development Research best practice learning and teaching re-	ICT Specialist Technical evaluators Curriculum specialists Subject area experts LRM policy coordinator/manager Support staff

Structure	Function	Roles & Responsibilities	Human Resources
		Develop final version	
Region Managers	Financial management	Budget allocation for LRMDS operation and maintenance  Networking and linkages with prospective funding agencies  MOOE allocation	Regional Director LRMDS Manager

### 9.3 Division

The LRMDS Administration & Lib hub Group at the Division level is responsible for supporting access to the system and reproduction of materials at the division for schools and training purposes. The Division QA and Production Team support re-contextualization of resources for localization and indigenization. Where major redevelopment work is required the Division submits a request and Design brief and specification to the Region LRMDS Manager.

The Division plays a crucial role in monitoring and evaluating the needs, access and use of LRMDS by schools, clusters and Community Learning Centres.

**Table 9 Organizational Structure for LRMDS**

Structure	Function	Roles & Responsibilities	Human Resources
LRMDS Administration & Lib hub	Provides access to LRMDS Implements use of LRMDS  Provides information and training on LRMDS function and services  Training of school heads and subject supervisors  Training program for access and use of LRMDS	Coordinates Online access to LRMDS  Catalogue of resources maintained.  Library maintained	Library/LRMDS manager/coordinator  Technical support
QA Production Team	Integrates content for local context/needs  Modifies content for local context/need  Monitors and evaluates access and use of LRMDS by schools, cluster, CLCs	Manage & catalogue Division/School generated resources  LR, TR/PDMs developed and reproduced for local use. ## 9.4 School/Cluster and Community Learning Centers

All school personnel may access and use the system. Schools and teachers are the primary users of the system and play a major role in identification of resources and areas of resource need. Schools and teachers also produce resources and these resources may be made available to share via the LRMDS.

**Table 10 Organizational Structure for LRMDS**

Structure	Function	Roles & Responsibilities	Human Resources
LR committee	Coordinate across subjects and levels access and use of LRMDS to support Teaching and Learning needs within the School/ Cluster/CLC	<p>Access LRMDS</p> <p>Identify LR Needs - LR Plan integrated with SIP/AIP/SRC</p> <p>Review existing LR in school and LRMDS and identify gaps &amp; priorities</p> <p>Review and evaluate teacher developed material</p>	<p>Principal/Assist Principal</p> <p>LR coordinator</p> <p>ICT Coordinator</p> <p>Subject Supervisors</p>

# Appendices

## 10.1 Appendix 1 Integrated Multi-layered SBM Systems

## 10.2 Appendix 2 - Use Cases

### **Scenario and use case:**

#### **Example Scenario 1:**

A non-central secondary school in Nth Samar was recently flooded during a typhoon. Many of the class sets of teaching and learning resources were damaged.

***In what way will the service and functions of the RELSS/LRMDS assist in alleviating/solving the problem for the teachers at this school?***

#### **Example Use case 1:**

Mr Joy is a secondary Mathematics teacher. His school does not have any computers at this time. He has travelled to the Lead school for Mathematics within his local cluster to search for resources for Year 9 Mathematics.

He is looking for student activities and lesson plans for Algebra.

He logs on to the LRMDS and searches for Year 9 Mathematics – algebra

The following list of resources is the result of his Search.

- Learning guide (BEAM) – solving algebraic equations: Learning resource 75:38 – Algebraic Expressions Competencies: [mathematics/7/3](#)
- Interactive resources – Exploring algebra, 3 containers complex proportional relationships
- Text Book reference: Year 9 Mathematics: located at Lead school
- 6 Worksheets for student activities – algebraic expressions and solving proportional problems.

Mr Joy prints out the Learning guide and all the worksheets. He makes enough copies of the worksheets for his classes. The printing costs are allocated via the school MOOE. On this occasion the local community has provided extra funding to the Lead school for resource reproduction.

He notes that he can borrow the text book from this school as there is a class set. He only wants a copy for his own reference.

He also copies the interactive resources to his own USB so that he can have a look at them on the computer at the Lead school. He thinks that this will give him some ideas for planning some lessons for his class on proportional relationships.

Mr Joy is looking forward to when computers are available at his school but in the meantime being able to easily search and find a range of learning materials related to his teaching program is very useful. This means he doesn't just have to rely on one textbook.

#### **Note:**

*It is important that the narrative of the use case identifies: Functions, Services, Facilities, Equipment, Human resources, Structure/organisation So that requirements (specifications) can be identified from the use cases. See highlighted text*

### **Use Case Scenario 2**

Ms Portia is a teacher at the Lead School in Region VII. Her school has a general purpose computer lab as well as portable computers. The school has wireless broadband so she and her students are able to access a range of learning materials online.

Ms Portia is planning her English classes and wants to develop a program around writing for different purposes.

## Use Case 2

From her office at the school she logs on to the LRM system to search for learning materials.

She enters the Search terms into the system: English language, literature, text types Year 7/8.

### Her Search response yields the following list of learning resources.

- **Interactive resources**

**Web Designer** Browse jumbled web pages, which are all connected with dragons. Match material to the type of website it belongs to: cultural, natural science or Chinese restaurant. Identify features of the texts. For example, identify opinion adjectives such as 'tasty' that describe restaurant food in a positive way. Match up the title, main body text, graphics and animation. Choose words and images suited to the topic or content. This learning object is one in a series of four objects.

**Rainforest** Track down a black panther reported to be prowling around a town. Interview witnesses and gather information from sources such as a website, advertisement and newspaper article. Notice that some of the statements may be wrong and the opinions may be biased. Choose the evidence most likely to be accurate. Rate reliability by using the SAFE test (Source, Attitude, Facts and Emotions). Identify when, where and how to find the panther. This learning object is one in a series of three objects.

- **Text book**

Text book for Secondary English – Chapter 4 Creating texts for different audiences.

Class sets available from regional library hub.

- **Learning resource guide:**

877: [935- Information in non-textual format](#)

Competencies: [english/7/1](#)

2 Instructions, Questions, Explanations and Responses

- **Listening**

- Listen to and carry out instructions given.
- Listen to explanations of specific processes noting sequence and cause-effect relationships.
- Adjust listening strategies (marginal, selective, attentive, critical) in relation to the main purposes of listening, one's familiarity with the topic and level of difficulty of a text describing a process and narrating short accounts.
- Distinguish what to do and what not to do in emergency situations (fire, typhoon, earthquake, etc.)
- Listen to clues to enable one to tune in to the topic.

- **Speaking**

- Give clear commands, requests and directions to get things done.
- Formulate responses to questions noting the types of questions raised (yes-no, wh-questions, alternative, modal, embedded).
- Respond to offers made (accept, turn down or negotiate changes in offers made).
- Give instructions, prohibitions, warnings.
- Ask and answer different types of questions when conducting an interview.
- Reading
  - Interpret instructions, directions, notices, rules and regulations correctly.
  - Read closely to find answers to specific questions, note sequence of events, etc.
- Literature
  - Show appreciation of literature specifically Philippine literature as a means of highlighting human rights in varied genres
  - Distinguish between the Language of Science and the Language of Literature

- **Online links**

English Listening Language Lab Online - Learn English Naturally

ELLLO is a collection of over 800 audio activities that ESL, EFL, and **English** students and teachers can access freely via the net.

[www.elllo.org/](http://www.elllo.org/)

Ms Portia spends some time reviewing the list and then decides to download the Learning guide to her local drive and to also download the interactive resources.

She wants to spend some time reviewing these and linking the interactives into the learning guide activities.

She will then copy her completed learning module to the Local server for her class to access the resources.

She has also set up an activity for the students to access one of the English language listening labs online. Ms Portia books the computer lab for this session so that all students can access individually the listening task.

For the other classes she will set up computer stations in the classroom for small groups of students to use to explore the interactives.

She also photocopies some of the worksheets for the students to complete and to submit for assessment.

### 10.3 Appendix 3 List of existing DepED and foreign funded project resources.

#### Foreign Funded

NEAP			Print and digital

## 10.4 Appendix 4 Excerpt Information & Communications Technology (ICT) Workplan Draft Version 0.5 August 13 2008.

### EXECUTIVE SUMMARY

“Knowledge is a fundamental driver of increased productivity and global competition. It is seminal to invention, innovation and wealth creation. *Information and Communication Technology (ICT) provides a foundation for building up and applying knowledge. Countries that use innovative information technology applications possess advantages for sustained economic growth and social development.*”

- *World Bank Strategy Report, April 2002*

STRIVE 2 was designed to develop and strengthen education management and learning support systems for School-Based Management (SBM), Human Resource Development - In-Service Education and Training (HRD-INSET) and Learning Resources Management and Development System (LRMDS) by improving access to quality basic education in selected provinces in the Visayas. These systems shall be established with quality, access and sustainability cutting across all systems. These systems shall be supported by ICT-enabled solutions that aim to, (1) strengthen information management at the regions and divisions to enable information-driven decision-making, planning, policy formulation, monitoring and evaluation and program management, and (2) provide a venue for connecting people to people and people to knowledge and information they need to effectively act and create new information, using available and internally developed ICT tools.

The Information & Communications Technology (ICT) Workplan shall serve as the blueprint for the design, development and implementation of an ICT Solution that will enhance and strengthen critical support systems at Regions VI, VII and VIII, in part through the practical application of these innovations in four (4) selected Divisions - Negros Occidental, Bohol, Tagbilaran and Northern Samar. The ICT Solution will be developed, implemented and refined in the STRIVE covered regions and divisions prior to a large scale roll-out to be undertaken by DepEd. The workplan was derived through a series of consultations and collaborative work with key stakeholders at the STRIVE region and divisions offices, the Office of Planning Service and the ICT Committee at the Central Office. In deriving the Solution System, an assessment of the current ICT resources and capabilities in the STRIVE provinces was conducted (see Annex A – ICT Situationer).

The **Solution System** is presented in this document in terms of the three (3) key components of information systems, which are Process, Technology and People. The Process component describes the functional design of the information systems and learning support system. It also provides the relevant strategies to develop these systems. The Technology component defines the technologies (hardware, software and communications) that will support the Process components, while the People component focuses on the organizational and institutional support strategies to be established to ensure that the Solution System is successfully developed and implemented within the effective term of STRIVE. Cutting across these 3 components are the policies that come with implementing and mainstreaming these systems. Policies and standards will be formulated and institutionalized alongside the roll-out of systems in STRIVE regions and divisions.

#### **Process**

The Process component of this Plan defines an Information Systems Architecture that builds on the existing systems and ICT structure, linking processes and data towards an Integrated Education Management Information System Framework. This framework has two major building blocks: (1) the web-based application systems supporting the critical processes of education management at all levels (school, division, region and national levels) and maintaining transactional databases, and (2) the system managing the learning resources including the vast unstructured knowledge holdings of DepEd.

This Section on Process provides a more comprehensive development and implementation plan of the key undertakings summarized as follows:

- a) Re-engineer the Basic Education Information System (BEIS) so that it becomes part of a web-based Integrated Education Management Information System of DepEd that will effectively support planning, policy formulation, monitoring and evaluation and quality assurance at all levels of the education management system.
- b) Develop a Training & Development Information System that is linked with the Human Resource Information System to support the development needs of teachers, school heads and education managers.
- c) Establish a Learning Resource Portal (eLearningResources) that consists of an Online Catalog of LRs, central repository of LRs, management and development of LRs at the STRIVE regions and divisions.
- d) Develop a Project Management Support System that consists of a Document Management System, Project Coordination Tool and Project M&E Database System.

The strategies for developing and implementing the Solution System are governed by the following principles:

- Use of web technologies and implementing the Application Service Provider (ASP) model for the application systems to eliminate problems and reduce cost in deployment and maintenance, and ensure sustainability of application systems;
- Use of Open Source Technologies for the development of the information systems to release users from the burden of software licenses and to respond to non-functional requirements that include portability and interoperability ;
- Involvement of system users in a joint application systems design and development to promote early adoption and ownership of the system, increasing the likelihood of sustaining the systems even beyond the project.

## **Technology**

The overall plan for the Technology Infrastructure of the Solution System is directed to (1) strengthen Network and Server Infrastructure in the DepEd Data Center to handle the IEMIS, T&D IS linkage to HRIS and the LRMDS, the latter requiring capability for document imaging, multi-media resources, audio and video streaming, and (2) beef up the capability of the regions, divisions and schools to access the centrally deployed systems through the internet. This shall be done in phases throughout the implementation of the ICT Workplan to cater to the ICT resource requirements of different application systems as these are implemented.

Other technology strategies address the following:

- Platform for technology and implementation of application systems;
- Centralized implementation approach, promoting web-based applications;

- Authoring tools for the development of LRs.

## People

The section on People Strategies proposes capability building programs that are directed towards promoting ownership and sustainability of the systems to be developed even at the early stages of the systems development. The ICT Coordinators are the focal persons for the ICT component of STRIVE in the regions and divisions. At the Central Office level, implementation arrangements with the UIS Task Force were drawn particularly in the development and implementation of the Integrated EMIS. Moreover, coordination mechanisms with the ICT Committee, apart from their involvement in the UIS Task Force, are evident particularly in the definition and implementation of ICT Policies and Standards and in the implementation of the ICT infrastructure in the Central Office.

## Development & Deployment Strategies

This Section defines the approach and methodology for developing and implementing the system. A Gantt Chart of the activities and the timelines for undertaking and delivering the required outputs is shown in Annex E. In summary, the schedule for the design, development and implementation of each system is shown in the table below.

<b>Systems &amp; Major Development Phases</b>	<b>Target Schedule</b>
<b>Integrated EMIS</b>	<b>June 2008 – March 2010</b>
<i>Design and Development</i>	<i>June 2008 – April 2009</i>
<i>Pilot Implementation</i>	<i>May 2009 – March 2010</i>
<b>Training &amp; Development IS</b>	<b>July 2008 – May 2009</b>
<i>Design &amp; Development</i>	<i>July 2008 – Feb 2009</i>
<i>Pilot Implementation (TNA, PPDS, TDS)</i>	<i>Jan 2009 – May 2009</i>
<b>Learning Resources Management System</b>	<b>June 2008 – Mar 2010</b>
<i>Design &amp; Development</i>	<i>June 2008 – March 2010</i>
<i>Soft Launch of eLearningResources</i>	<i>March 2010</i>
<b>Project Management Support System</b>	<b>Oct. 2008 – Nov. 2008</b>
<i>Design &amp; Development</i>	<i>Oct 2008 – Nov 2008</i>
<i>Pilot Implementation (TNA, PPDS, TDS)</i>	<i>November 2008</i>

## Investment Requirement

The Investment Requirement Section presents the estimated costs for the establishment of the technical infrastructure to support the Solution System. This technical infrastructure consists of the hardware and communications facilities, including the software for developing learning resources. The cost of developing the systems and the infrastructure for the Project Management Support System shall be covered by STRIVE, while the infrastructure component of the IEMIS, T&D IS and LRMDS shall be provided by DepEd. While this plan presents the minimum ICT requirements, the precise contributions of STRIVE and DepEd in terms of ICT and network infrastructure are to be determined separately, since, as indicated in the Assessment Report, the regions currently differ in their capacity to implement the information systems and will therefore require different levels of input in this regard.

Indicative investment requirements are summarized in the table below. Details of these costs are shown in Section 5 – Procurement Plan.

<b>Systems By Site</b>	<b>Indicative Investment Requirement</b>
<b>Central Office (Data Center)</b>	<b>6,965,000.00</b>
<i>Integrated EMIS</i>	<i>1,365,000.00</i>
<i>LRMDS</i>	<i>5,600,000.00</i>
<b>Regional Office</b>	<b>2,080,000.00</b>
<i>Integrated EMIS</i>	<i>670,000.00</i>
<i>LRMDS</i>	<i>1,200,000.00</i>
<i>Training &amp; Development IS</i>	<i>210,000.00</i>
<b>Division Office</b>	<b>2,080,000.00</b>
<i>Integrated EMIS</i>	<i>670,000.00</i>
<i>LRMDS</i>	<i>1,200,000.00</i>
<i>Training &amp; Development IS</i>	<i>210,000.00</i>
<b>Cluster Schools</b>	<b>332,000.00</b>
<b>STRIVE Project Management Support System</b>	<b>960,000.00</b>
